

Okinawa e-island Declaration

Rapid progress in information and communication technology brought a big change in our daily life and economic activity reaching beyond the national border and distance.

We actively seek for state of the art technology as a pioneer into this new century.

By making the best use of IT in every field, we realize peaceful and affluent Okinawa, where people, goods, and information come and go and it out stands in the international arena.

Okinawa will bestow;
bright joy to those who are born in the island;
power to pioneer into the future to those eager to learn;
hope and pride to those who work;
health and long life to those who live;
peace of mind to those who come;
and unlimited future to those who pioneer.

we here wish that Okinawa contributes to an international world, and becomes e-island which seeks co-existence in the world.
