

# Innovative pilot training project utilizing Shimojishima Airport

## <Significance of the project>

Shimojishima Airport, originally built for airline pilot training, its geographical characteristics and location are quite advantageous for training pilots from Taiwan and Asia in general.

## <Overview of the project>

Utilizing the advantage of Shimojishima Airport, we will implement a pilot training project against the background of Asia's pilot shortage which will last for 20 years.

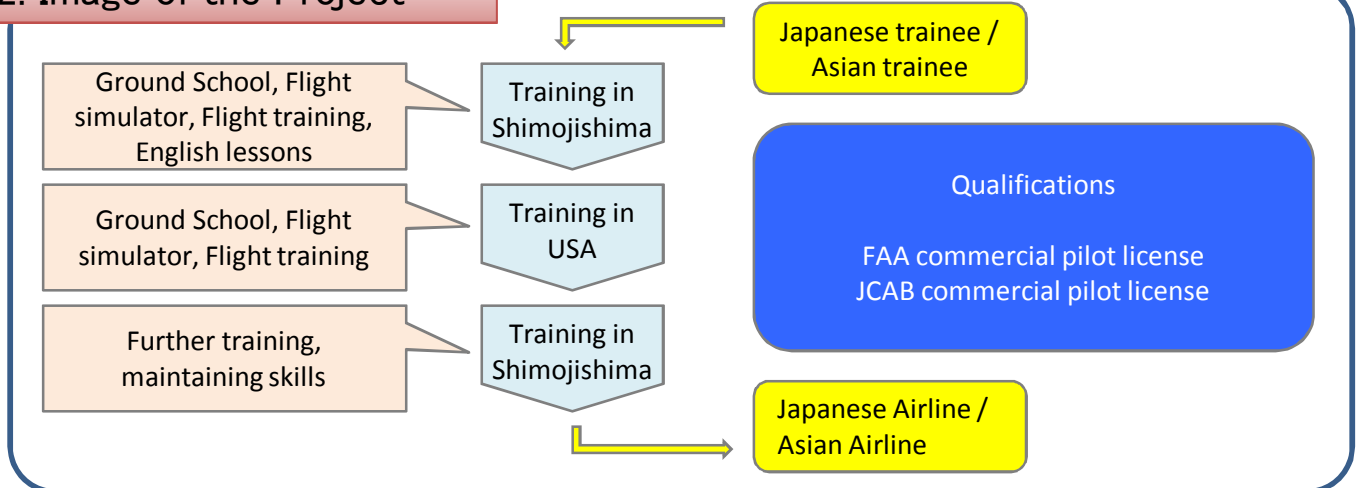

## <Business Operator>

FSO Co., Ltd.  
(Chatan-cho , Okinawa)

## 1. Overview of the Project

- Train pilots that can be active domestic and overseas.
- Provide qualifications according to JCAB and FAA standards
