Manufacturing costs can be reduced and lead times cut.

Okinawa Yamato Transport has a logistics facility "Southern Gate" that is located within the special economic zone. By building your bonded factory in this facility, you can repair goods collected from other countries and manufacture products without having to pay tariffs or consumption tax. At the same time, as Southern Gate is adjacent to Naha Airport, logistics costs and lead times can be reduced.

Logistics

Delivering Japan's Specialty Goods from Okinawa to the Asian Market Logistics

Okinawa Prefecture is working to become Japan's number one logistical hub for specialty goods and is collaborating with various regions. By utilizing the Okinawa International Logistics Hub, specialty goods will pass through Okinawa and be exported swiftly to Asia.

Becoming Japan's Logistical Hub for Specialty Goods

Deliver Fresh Japanese Specialty **Products Overseas**

The rapidly developing Asian economies are also showing a diversification in food needs.

The demand for delicious and safe Japanese food products has increased along with the growing demand for imported food. The Okinawa International Logistics Hub adds increased value to Japanese specialty products by delivering fresh food guickly and efficiently.

Strategies implemented by Japan and municipalities throughout the nation have driven up the volume of agriculture, fishery, and goods transported by air. As the Okinawa International Logistics Hub gains a reputation for being able to deliver fresh food to Asia, the volume of foods passing through Okinawa is expected to grow in the future. Expanding Possibilities as a Specialty Goods Logistics Hub

Shizuoka Prefecture "Traveler Belly Space" Model*

Shizuoka Prefecture has been promoting a local product transportation scheme utilizing the cargo space of passenger planes of the Shizuoka-Naha route and the Okinawa International Logistics Hub since 2011.

In addition, from 2013, Shizuoka Prefecture dispatches its staff to a trading company in Okinawa Prefecture to develop overseas sales channels. Thus, both prefectures are expanding exports by collaborating each other.

For strawberries, one of Shizuoka's significant export products, special pallets are introduced to prevent damage from vibration and impacts during shipment, making it possible to preserve the quality of the product and establish a "Shizuoka style overseas shipment model."

Utilizing the Shizuoka model and Okinawa trading company, Shizuoka Prefecture is working on expanding exports, including the products from the surrounding area in addition to those of the prefecture.

*Belly space refers to the cargo space located under the floor of passenger flights.

Kagoshima Prefecture "Ship & Air" Model

Kagoshima Prefecture is endeavoring to expand exports of Kagoshima products. In December 2017, Kagoshima established a new transportation scheme that utilizes the Okinawa International Logistics Hub for sea and air transport. The sea transport network uses the geographic advantage of having a short shipping distance from Kagoshima to Okinawa. Combined with the air transport network based at Naha Airport and extending across Asia, Kagoshima can shorten lead time and reduce transport costs, providing a speedy and reasonable transport system.

Using this new transport scheme, Kagoshima Prefecture is expanding its0 products such as livestock, marine products, and agricultural products.

high-quality frozen food processing and machine manufacturing factory, in addition to the direct import of materials from domestic agricultural regions, we aim to produce high-value-added, fully-cooked "made-in-Japan" products and export them to overseas retailers.

"High Quality Freezing Technology

+ Central Kitchen"

With the new "High-quality freezing technology + central kitchen" model, our initiative utilizes the Okinawa International Logistics Hub to promote domestic cooperation by approaching the issue from a societal perspective, with topics such as increased export of Japanese products and reducing food losses.
