

USASUKA DRAGON PILLARS

- 1. The Usasuka is the place where the king's throne is positioned on the second floor of the Seiden.**
- 2. The dragon pillars placed here are a pair of wooden sculptures of the a-hūm dragons and are made from Japanese camphor wood.**
- 3. These pillars were created with consideration for the Usasuka dragon pillars of the Heisei Restoration and the stone carvings on the smaller dragon pillars in front of the Seiden.**
- 4. These sculptures embody the dynamic energy that is characteristic of wooden carvings.**
